

# PANCREATIN PREMIX PELLETS

**THE PANCREAS IS AN ORGAN IN ANIMALS AND PEOPLE THAT MAKES CHEMICALS – AMYLASE, LIPASE, AND PROTEASE – THAT ARE NEEDED FOR PROPER DIGESTION.**

**DID YOU KNOW?**

***Pancreatin*** is used to treat digestion problems that result when the pancreas has been removed or is not working well. Cystic fibrosis or ongoing swelling (chronic pancreatitis) are two of the conditions that can cause the pancreas to function poorly.

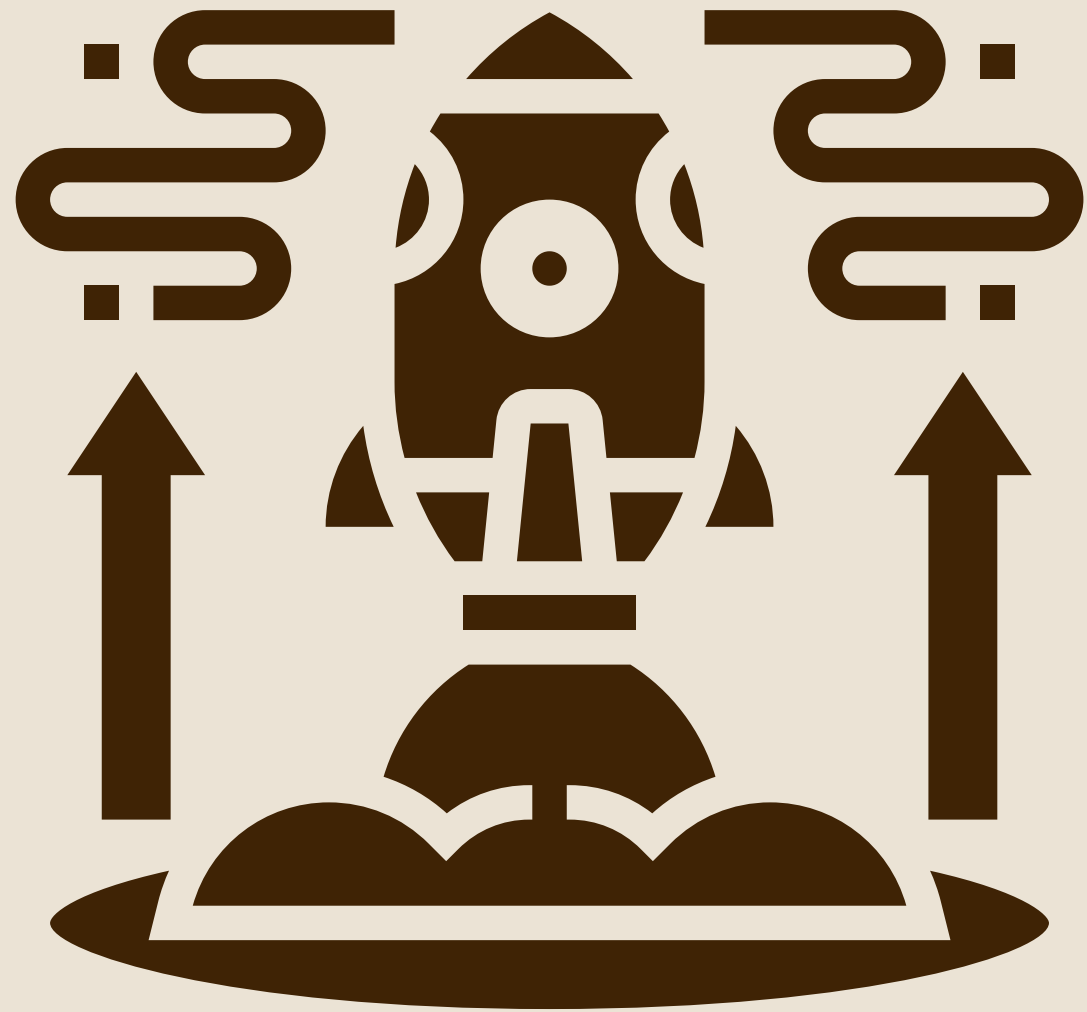

Pancreatin is also used for intestinal gas (flatulence) or as a digestive aid.

### **How does it work?**

Pancreatin contains amylase, lipase, and protease - chemicals that help to digest food. These chemicals are normally produced by the pancreas. Pancreatin helps break down food and convert it into energy. It is commonly used to manage pancreatic insufficiency, a condition where the pancreas doesn't produce enough enzymes to properly digest food. This may be caused by cystic fibrosis, chronic pancreatitis, gastric bypass surgery, and more

## **PANCREATIN USES**

## PRODUCT NUTRITIONAL VALUE

**(25000 IU STRENGTH)**

- 1. Caloric Value (Energy) 2.08 Kcal /378 mg**
- 2. Carbohydrates (Including sugar & fibre)  
330 mg/378 mg**
- 3. Fibre B.Q. L/378 mg**
- 4. Sugar B.Q. L/378 mg**
- 5. FAT B.Q. L/378 mg**
- 6. Protein 190 mg/378 mg**

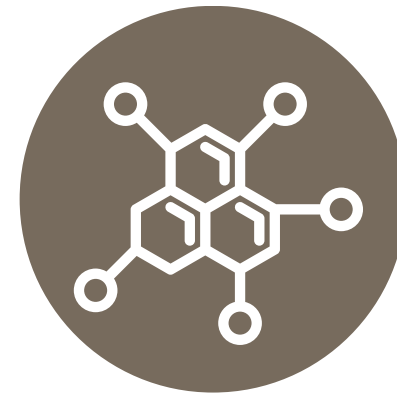

**(Kcal: Kilo calories, B.Q.L: Below Quantification Limit,mg: Mili gram)**
